EXP: 5b

Student Admission Command Center — Page Elements Use Case

Aim:

To design and build a **single internal Command Center Page in Zoho Creator** for the **Student Admission Enquiry Management** application by using all **eleven Page Builder elements**, enabling the Admission Cell to monitor enquiries, manage the admission pipeline, search applicants, view documents, and perform quick actions from one unified workspace.

Page Elements Used:

S.No	Page Element	Element Name	Purpose
1	**Panel**	Command_Center_Main_Panel	Acts as the main container for the entire command center page.
2	**Board**	Enquiry_Status_Board	Provides a Kanban-style view to move applicants through admission stages.
3	**Chart**	Course_Popularity_Chart_Widget	Displays enquiry counts for different courses using a bar chart.
4	**Gauge**	Seat_Fill_Target_Gauge	Shows the progress of seats filled compared with total available seats.
5	**Search**	Applicant_Search_Bar	Allows staff to quickly search applicants by name, register number, or course.
6	**Form**	Quick_Counter_Enquiry_Form	Allows staff to directly enter a new student enquiry from the command center.

S.No	Page Element	Element Name	Purpose
7	**Report**	Full_Enquiries_Report	Displays complete enquiry records for detailed review and export.
8	**Snippets**	Admission_Process_Checklist_Snippet	Shows admission steps and required-document checklist for quick reference.
9	**Button**	Send_Counselling_Reminder_Button	Provides a quick action to send counselling reminders to applicants.
10	**Widgets**	SeatAvailability_And_Scholarship_Widgets	Displays seat availability and scholarship eligibility information.
11	**Viewer**	Marksheet_Certificate_Viewer	Allows staff to view uploaded mark sheets and certificates without leaving the page.

Workflow Summary:

Step 1: An Admission Cell staff member opens the Admission_Command_Center_Page and immediately sees the Seat Fill Target Gauge and Course Popularity Chart for a quick status check.

Step 2: If they need to find a specific applicant, they use the Applicant Search Bar rather than scrolling through the full report.

Step 3: As document verification proceeds, staff drag applicant cards across the Enquiry Status Board to reflect the current stage.

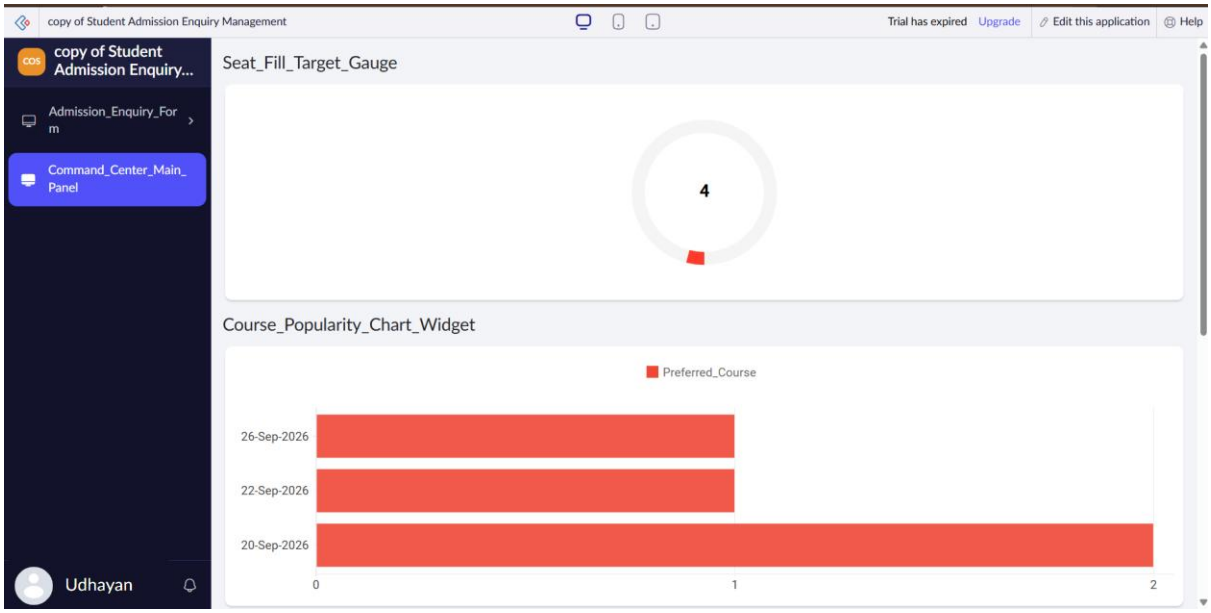

Step 4: For applicants with counselling sessions scheduled soon, staff click the Send Counselling Reminder Button to trigger bulk reminder messages.

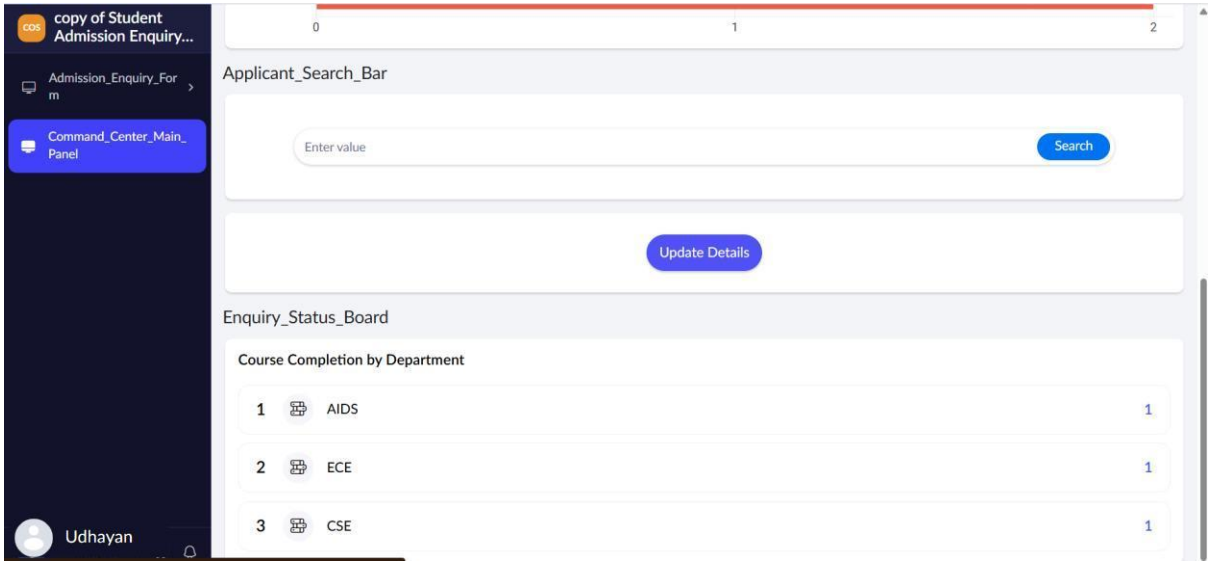

Step 5: For a walk-in applicant, staff use the Quick Counter Enquiry Form directly from the command center instead of navigating to a separate page.

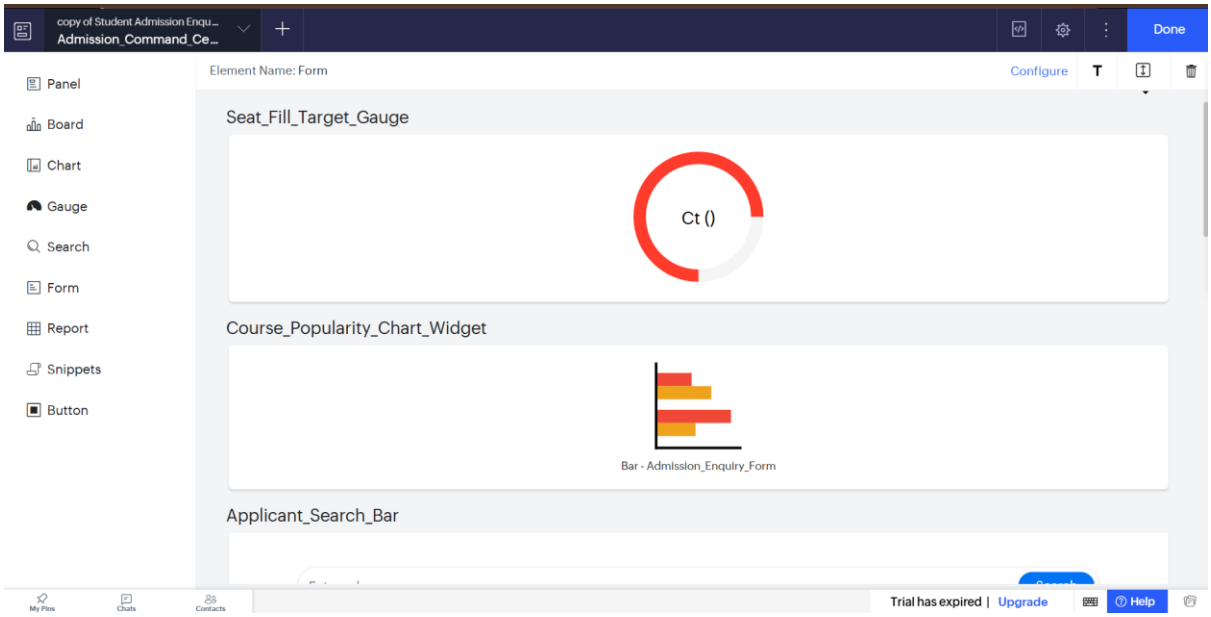

Step 6: For deeper analysis or export, the Admission Cell head scrolls to the Full Enquiries

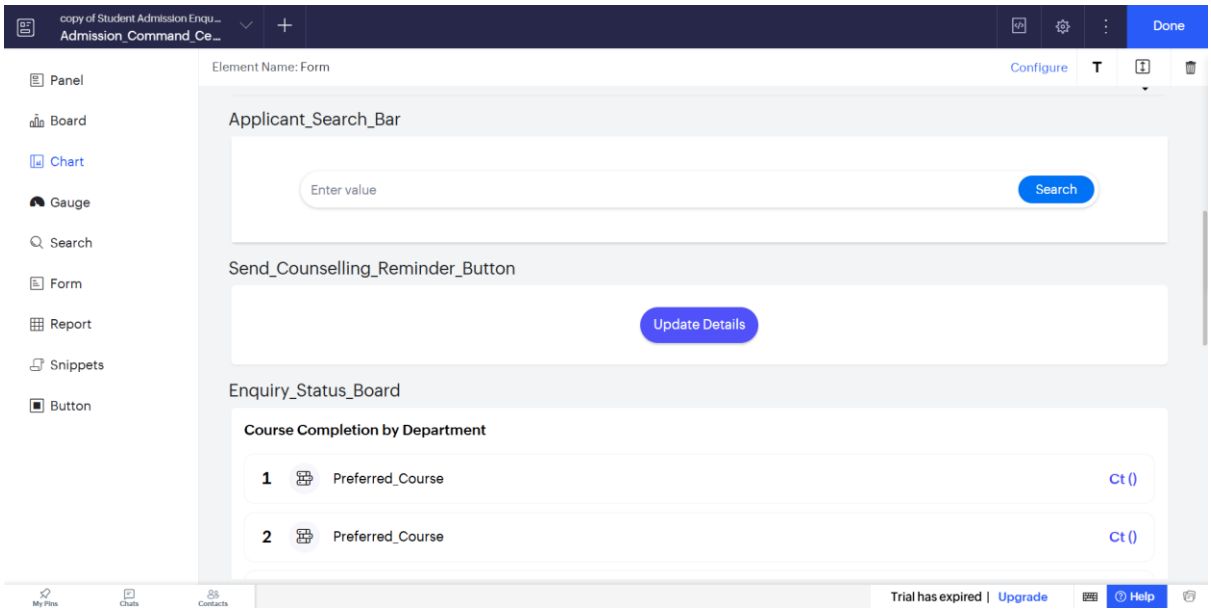

Report.

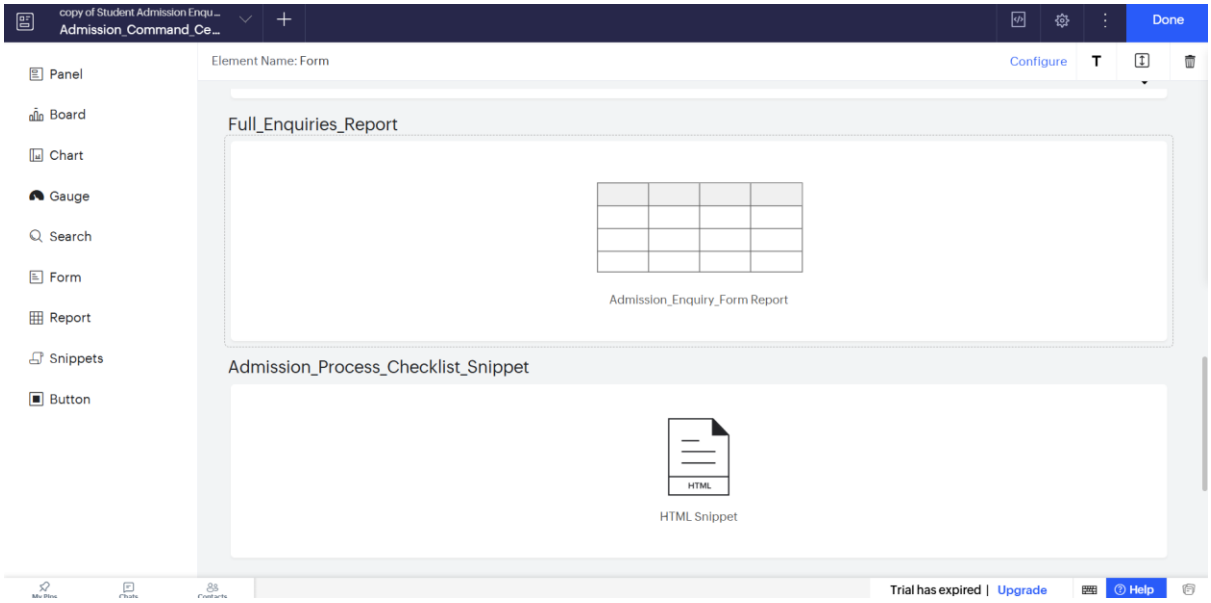

Step 7: When a parent asks about required documents or scholarship eligibility, staff refer to the Admission Process Checklist Snippet, check the Scholarship Widget, and open the Marksheet Certificate Viewer to verify uploaded documents.

Result:

The Admission Command Center Page was successfully designed in Zoho Creator using all 11 Page Builder elements. It provides a unified workspace for the Admission Cell to monitor enquiry status, track seat availability, search applicants, add new enquiries, manage counselling stages, view reports, send reminders, and access uploaded documents from a single page.

Thus, the page improves the speed, organization, and efficiency of the student admission enquiry process.
