Student Admission Automation Suite — Workflow Options Use Case

Aim:

To design and implement a complete automation system in Zoho Creator for the Student Admission Enquiry application using all eight workflow options: Form Workflows, Schedules, Approvals, Payments, Blueprints, Batch Workflows, Report Workflows, and Functions, to automate enquiry acknowledgements, counselling reminders, scholarship approvals, application fee collection, admission confirmation letters, and fee recalculation, ensuring an efficient, accurate, and controlled admission process with minimal manual intervention.

Workflow Summary:

Step 1: An applicant submits the Admission_Enquiry_Form, immediately triggering the On_Enquiry_Submit_Workflow (Form Workflow), which sends an acknowledgement.

Step 2: The Application_Fee_Payment_Workflow (Payments) generates a payment link and updates Fee_Paid_Status once the applicant completes payment.

Step 3: If the applicant is eligible for a scholarship above the threshold, the Scholarship_Waiver_Approval (Approvals) routes it to the Dean/Admission Head before the waiver is applied.

Step 4: The record moves through the Admission_Lifecycle_Blueprint (Blueprints) stages as staff verify documents and schedule counselling, each transition logged with a comment.

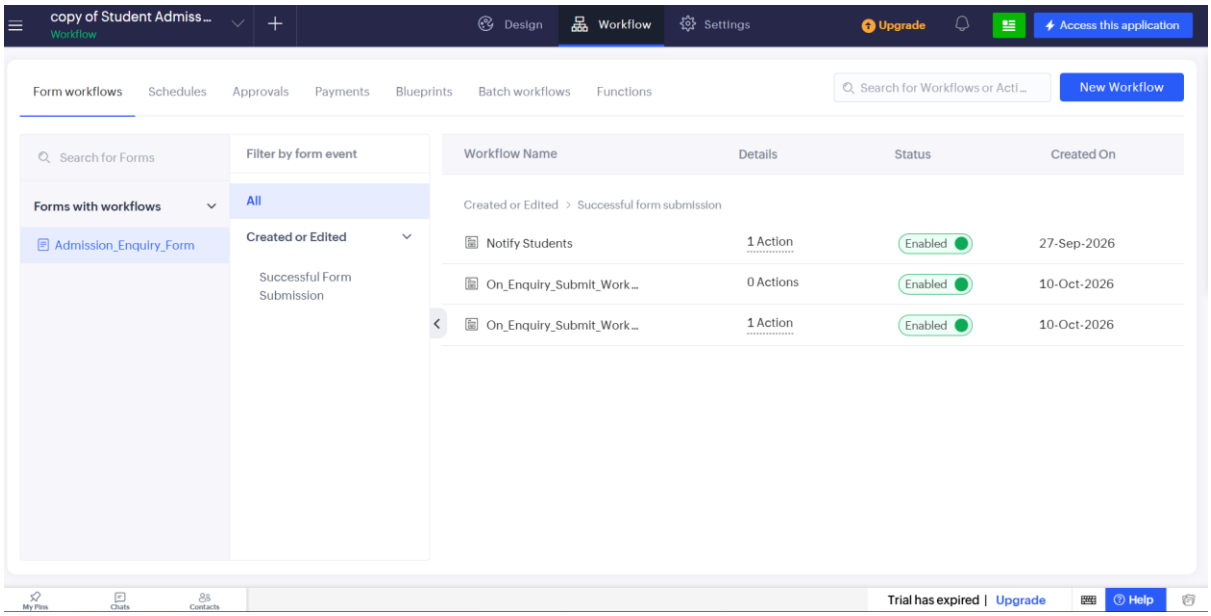

Step 5: Each evening, the Daily_Counselling_Reminder_Schedule (Schedules) automatically emails applicants with a counselling session the next day.

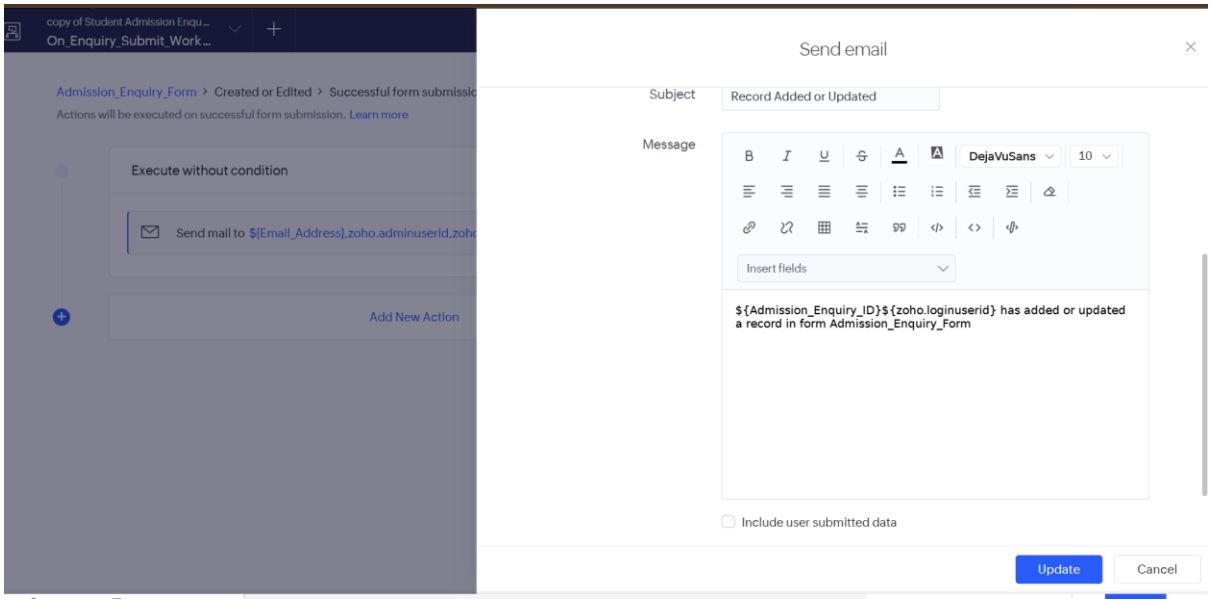

Step 6: If the Admission Cell manually adjusts the scholarship percentage in the report, the OnEdit_Recalculate_NetFee_Workflow (Report Workflows) keeps the net application fee accurate.

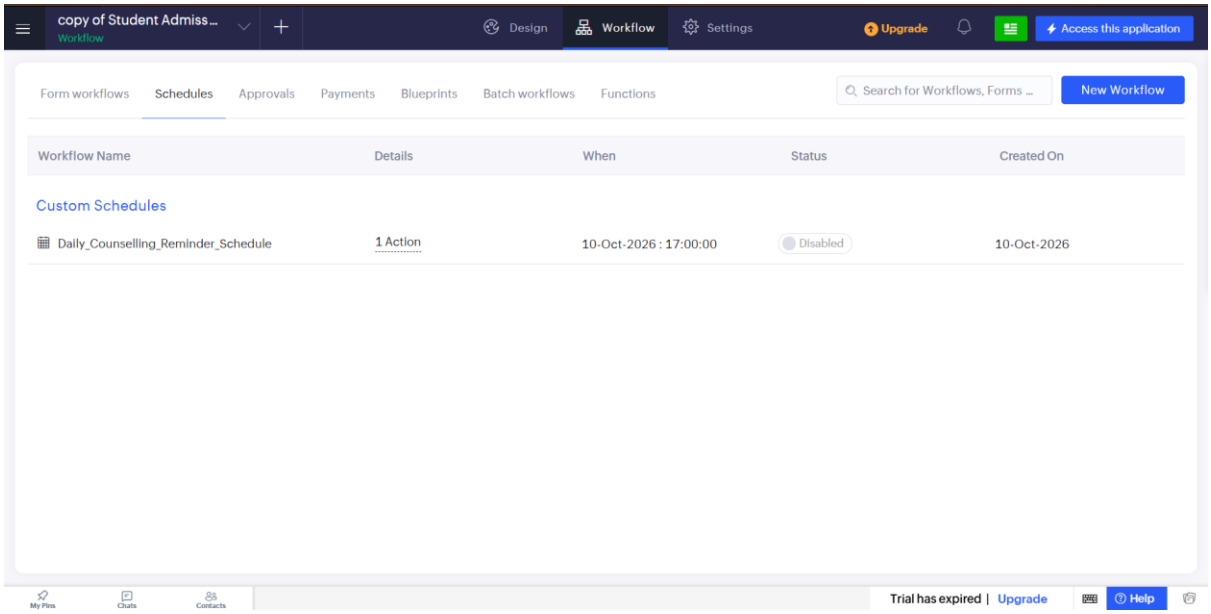

Step 7: The moment an applicant is marked Admitted, a workflow calls the Generate_AdmissionLetter_Function (Functions) automatically.

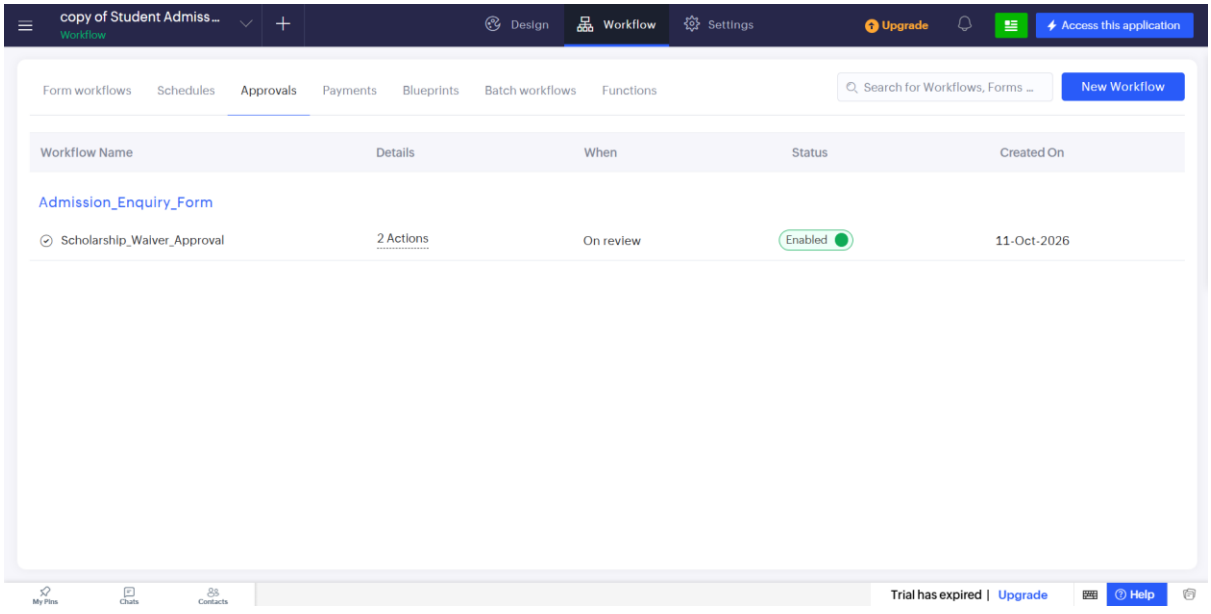

Step 8: At the close of each counselling round, the Admission Cell triggers the

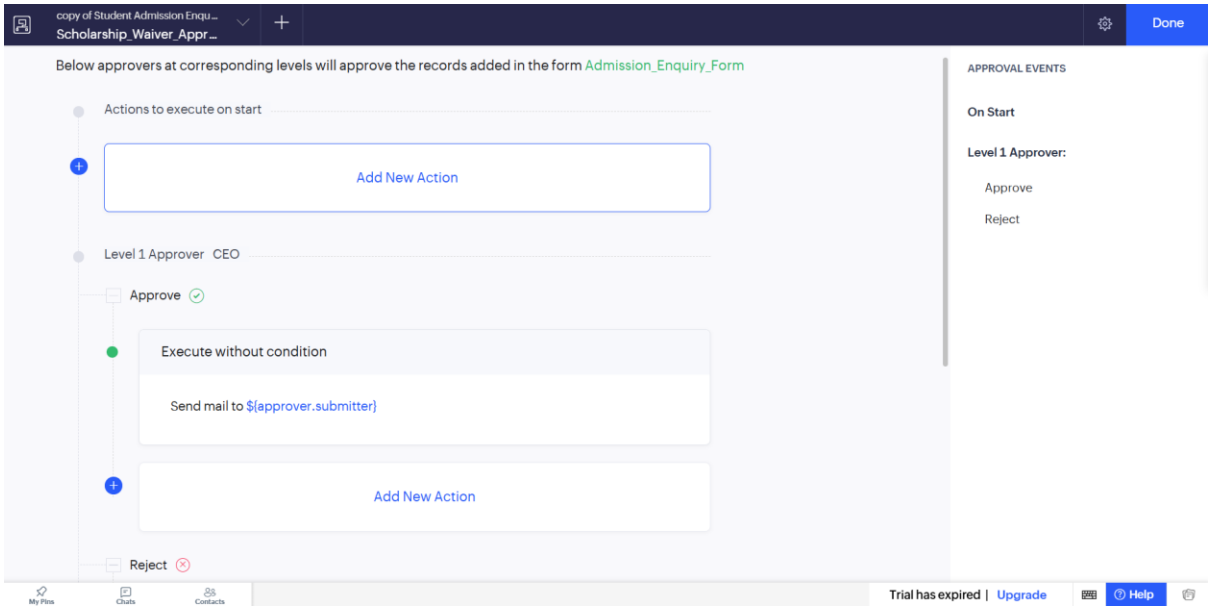

Bulk_Admission_Confirmation_Batch (Batch Workflows) to send confirmation letters to the entire newly admitted cohort, processed in controlled batches.

Result:

The complete automation layer for the Student Admission Enquiry application was designed using all eight Zoho Creator workflow options. Enquiry acknowledgements and counselling reminders are automated, scholarship-linked fee waivers are routed for approval, application fee collection is managed, admission status is controlled through Blueprints, batch confirmation letters are generated, report-based actions are automated, and custom functions handle fee recalculation. Thus, the system reduces manual effort, improves accuracy, and ensures a smooth and efficient admission process.
