Experiment 4a: Form Design for Student Admission

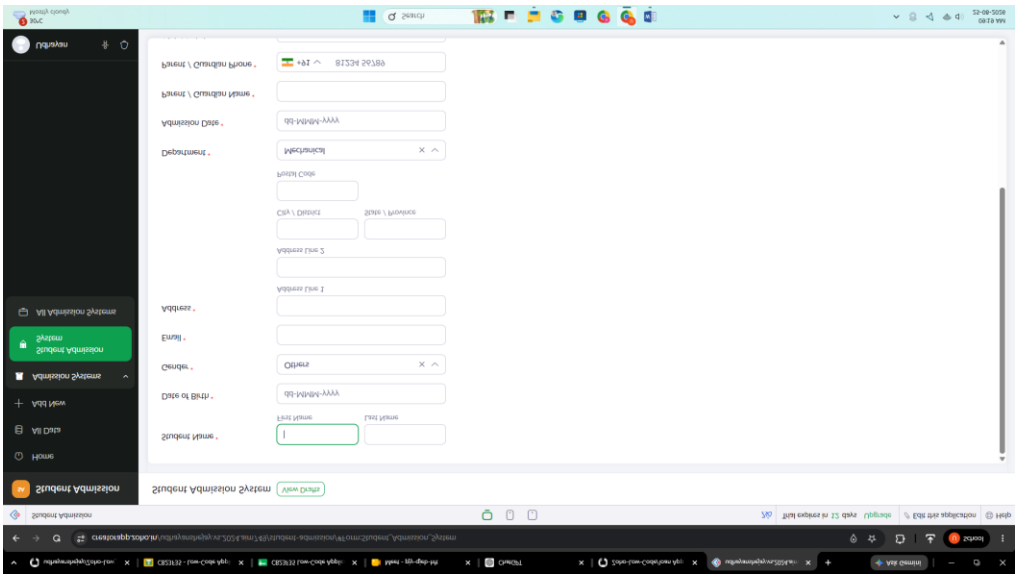

Aim

To design a data model and user-friendly Loan Application Form in Zoho Creator for storing and managing loan application details efficiently.

SCREENSHOTS:

Observation

The Student admission was organized into sections such as Personal Details, Contact Details, Academic Details, and Career Details. The data was structured properly, making data entry, storage, and retrieval simple and accurate.

Result

The form design for the Student Admission were completed successfully. The experiment showed that Zoho Creator helps create well-structured forms and organized data management with minimal coding effort.
